Fallen Angels
Aerosmith

```
         C                        Am
There s A candle Burning in this world tonite
    G                       F        G
Another child who vanished out of sight
         C                        Am
And a heart is broken, another prayer in vain
           G                        F       G     Am   G
There s a million tears that fill a sea of pain

F             G           C
Sometimes I stare out my window
F             G           C
My thoughts all drift into space
  F                 C               G
Sometimes I wonder if there s a better place

C                            Am
Where do fallen Angels Go? (I just don t know)
G                            F          G       Am         G
Where do fallen Angels go? They keep falling (They keep falling)
```
