Nothing Else Matters
Agnes

```
F#                 C#                   Ebm
Iâ€™ll live for you, Iâ€™ll breathe for you
            B
Iâ€™ll be for you
F#                      C#
I can hear above the noise
                            Ebm
There is something on the wind
                 B                 F#
And behind your eyes I can see the pain
                     C#
I am not a shallow sea
                       Ebm
I run deeper than you think
                 B
And I will not leave

                            F#
When the echoes from the walls
                        C#
Are the voices in your head
                     Ebm
Donâ€™t listen to the lies
                     B
Just hear my words instead
                     F#
For now and ever more
            C#                      Ebm
I live for you, Iâ€™ll breathe for you
             B                        F#
Iâ€™ll be for you and nothing else matters
                 C#                      Ebm
Nothing else matters, nothing else matters
                  B
Nothing else matters

F#                   C#
Every silence of a sigh
                      Ebm
I can feel it on my skin
               B                  F#
Every cry for help tears into my heart
                       C#
Love is not a shallow sea
                           Ebm
It runs deeper than you think
                 B
```

And it will not leave

```
                            F#
When the echoes from the walls
                        C#
Are the voices in your head
                    Ebm
Donâ€™t listen to the lies
                    B
Just hear my words instead
                    F#
For now and ever more
            C#                      Ebm
I live for you, Iâ€™ll breathe for you
             B                        F#
Iâ€™ll be for you and nothing else matters
                  C#                      Ebm
Nothing else matters, nothing else matters
                  B
Nothing else matters

F# - C# - Ebm - B
F# - C# - Ebm - B

F#                C#                  Ebm
Iâ€™ll live for you, Iâ€™ll breathe for you
            B         F#
Iâ€™ll be for you
```
