Buicks On The Moon
Alan Jackson

```
| e | -----------------------|
| B | -----------------------|
| G | -------0-0h2p0-----0---|
| D | ---0h2---------0h2-----|
| A | -----------------------|
| E |------------------------|
```

```
 G                       C               G
How long will I love you I don t really know
    C                G        D
I d like to think forever is how far we could go
  G                           C             G
So let me paint a picture of how it s gonna be
     C                  D             G
The day you don t mean everything to me

Chorus:
        D                          C                  G
When a nickel s worth a dollar and gold ain t worth a dime
          D                                C                 D
When they build a ship on waters that will take you back in time
          G                              C             Em
When the stars have all been counted and I stop lovin  you
       C                 D            G
Honey they ll be drivin  Buicks to the moon

G   C   Em

C   D   G

 G                       C               G
You don t have to worry about what comes to pass
    C                      G                D
This ol  world may wear out but my love s gonna last
 G                       C               G
If they ever build that highway to the moon
     C                  D             G
I ll just find somethin  else to promise you

          G                              C             Em
When the stars have all been counted and I stop lovin  you
       C                 D            G
Honey they ll be drivin  Buicks to the moon
```
