The Truth
James Arthur

verse 1

```
Bm                                G           D
 It was good to be there in the bright lights, mmm
Bm                                  G       D
 But I lost good friends under the spotlight, woah
Bm                    G             D
 Imagine if everybody knew your name
              Bm                  G                   D
 But they had nothing nice to say, nothing nice to say
Bm                                G        D
 It was good to be living up the high life, woah
Bm                                 G         D
 But the comedown s harder in the headlines, woah
Bm                                G          D
 Everybody tells you, you should play the game
             Bm               G                    D
 But there s only you to play, there s only you to play
       Em      G
 But I tried
```

```
                  Bm
I set fire to the glory
                  G
I set fire to the dream
                  D
I set fire to the only thing
                     A
That led me from the streets
                   Bm                          G
Don t tell me it s over, cause I don t want to believe
                         D                               A
Cause now I ve opened my eyes and I have found a way to breathe
                  Bm
The truth sets me free
```

verse 2

```
Bm                          G           D
 I broke my back to make a breakthrough, mmm
Bm                             G       D
 I lost my mind, look what it came to, oh
Bm                               G         D
```

```
 I had to lose it all so I could understand, woah
Bm                        G          D
 I was just a boy in the shadow of a man

                   Bm
I set fire to the glory
                    G
I set fire to the dream
                   D
I set fire to the only thing
                      A
That led me from the streets
                    Bm                              G
Don t tell me it s over, cause I don t want to believe
                          D                                A
Cause now I ve opened my eyes and I have found a way to breathe
                       Em      Bm
Oh, the truth sets me free
                       Em      G
Oh, the truth sets me free

                   Bm
I set fire to the glory
                   G
I set fire to the dream
                   D
I set fire to the only thing
                      A
That led me from the streets
                    Bm
Don t tell me it s over
                G
I don t want to believe
                          D                                A
Cause now I ve opened my eyes and I have found a way to breathe
                       Bm     G
Oh, the truth sets me free
                       D      A
Oh, the truth sets me free
                       Bm     G
Oh, the truth sets me free
                       D       A
Oh, the truth sets me free
           Bm
It sets me free
```
