Everyone Safe
Blackmail

```
Bm              A
Want you back, won t you stop?
                                          G
You re never leaving, never leave that far
        C#                      D
But now you ve seen my cards
          C#      Bm     A
Would you say that I m wrong?
                                          G
I m not impressed; I m not the only one
        C#              D
And I cannot come along
G
Won t you please not come back
                Em
We ll never be apart
&#8232;I don t complain about the mess
                Fm#     G
That you left inside my heart
 &#8232;Won t you please not come back
                        Em
Don t tell it from the start
You re never safe in the dark
        D       C
So I must be around

I ve never seen you fall
I always tried to tumble down the wall
You ve built around us all
Now I ve tripped to your head
I could have lied &#8232;But I know what it s like to be dead
Though I m still alive instead
Won t you please not come back
We ll never be apart
I don t complain about the mess That you left in my heart
Won t you please not come back Don t tell it from the start
You re never safe in the dark Well,
I see you re feeling down
When you hear this creepy sound
I ll always be around
```
