Gone So Long
Breathe Carolina

Capo 1

Verses:

```
Em                  D          A
My eyes open to the sound of a song I ve heard,
Em                        D            A
Don t know the name but I know all the words
Em                            D
Sun came up, crawled into the front seat
         A                        Em
Memories leaving me, was it all a dream I had?
               D         A
Time for us to wake up

             Em                        D
I ll save my words to make the most of it
        A
I never meant to be gone so long
```

Chorus:

```
Em           D                    A
Do you still remember my touch at all?

I never meant to be gone so long
Em           D                    A
Do you still remember my touch at all?

I never meant to be gone so long
```

Bridge:

```
Em
The world still moves on

I m sorry I made you wait
D                      A
I wish that I, I could stay
```

The rest is pretty self explanatory, hope you enjoy! :)
