Fm Bbm G#
C# Fm Bbm G# x2

[Verse 1]

```
C#                                    Fm
Timber shakes these trails they all derail
                        Bbm
Phony, false and frail
               G#
An empty ocean lost our way with no direction home
C#                                        Fm
Golden needles names we take in vein
                      Bbm
Find it harder to remain
                                G#
And nothing s sacred still waiting on that explanation
```

[Chorus]

```
C#
Right before my eyes
           G#
I saw the whole world lose control
      Bbm
The whole world lost control
           F#          G#
Before my eyes uh-huh
C#
I fell through the floor
             G#
I couldn t take it anymore
       Bbm
I can t take this anymore
             F#      G#
It breaks my mind uh-huh
```

[Verse 2]

```
C#                             Fm
Hold your dirty hand over the flames
                           Bbm
```

Getting pleasure from the pain
