Saturdays Child
The Walker Brothers

Saturday s Child

```
C#
Don t stop, don t turn around
                                  F#
It s just lonely clown who keeps calling
                                 C#
But you ve grown quite out of love with him

C#
The city s endless nights
                                          F#
The in-crowd gay young faces have been washed away
                         C#
By too many through the night and day

Chorus:
           G#7                C#
Saturday s child who used to say
               G#7               C#
That she could dance the world away
           B                                     C#
Saturday s child just hangs her head and cries today

How could you be so blind?
Just waking up to find
What a fool you were,  cause you let him break your heart

You turn, you break, you bend
You re left without a friend
When you seemed to have so many at the start

Chorus (repeat and fade)
```
