Though I Know She Lies
Chris Bell

Though I Know She Lies

```
G                        C      D           G     C D
When I look though your eyes I tend to get bitter
G                C        D       G     C D
Maybe I m best advised to look to myself
Am     Bm    Em   Am       Bm       Em
I fall every time though I know she lies
        Am   Em D
I can t stay away

Stars would fall from the sky and I won t forsake you
You ve got lust in your heart what s sad to me
Am       Bm    Em    Am  Bm           Em  D
I ll use every line, anything to make you mine

D#6                G                       Cm
Keeping me in the dark wondering where you are
                   Em
Don t let me fall apart
         A       D        A       D
You said take it slow but I don t know
        G
I don t know

Lying awake in the bed trying to cope with the feelings
I m don t know if it s love but what can I do
I fall every time though I know she lies
I can t stay away
```
