White Noise Maker
Frank Black

From: Jere Klami

I tried to write down the synth chords where possible. You can play along with them with a guitar. The song starts with bass. Corrections, complaints compliments and congratulations welcome. I didn t write the whole lyrics.

```

(bass)

Not much new happens after the solo, the song just repeats itself. The solo is not rhythmically correct, so play with the record. I m sure this isn t the best way to place your fingers while palying, but it was easiest for me to write down this way.
