

Funeral 1476

The song is played in half-step down tuning but I didn't feel like adding flat symbols to the chords so just play the song with these chords only a step down from standard. Also on a side note when playing GM7 make sure for it to be in open position, in fact they are all open position chords but it's important to play GM7 open because while you're playing this chord the note-run melody is played in the 2nd fret of the the high E going like this 2nd 3rd 5th 3rd on the frets and at one point the note run switches between 2nd and 3rd only.
