Try It On
Interpol

Artist: Interpol
Song: Try It On
Album: Interpol

Intro: **G Bm F#m Em**

Riff:
```
e|-------------------------|
B|--10---------------------|
G|----------12-10-9---10---|
D|-------------------------|
A|-------------------------|
E|-------------------------|
```

```
G                                   Bm
 I need the sun light, to keep me above
               F#m   Em
 These moderations
G                                            Bm
 I always hoped for, did all this work for
               F#m       Em
 Some piece of mind and just because
G                                 Bm
 On this side you wanna see that,   there s no change
                  F#m   Em
 And somewhere to stay
G                                          Bm
 But if your right, Ill put my keys back   (There s no change)
                F#m    Em
 And no hand to play
```

Chorus:
```
 G                 Bm
 Please explore my loves endurance
     F#m    Em
 And stay, stay
 G                Bm
 Please endure my loves exploitations
    F#m              Em
 No way, no fucking way no
G                                 Bm
 On this side, you wanna see that   there s no change
                  F#m    Em
 And somewhere to stay
G                                 Bm
 On this side, your gonna see that   there s no change
```

```
                F#m    Em
 And nowhere to stay

        G
 Try it on, try it on, try it on, try it on
        F#m
 Try it on, try it on, try it on, try it on

 Try it on, try it on, try it on, try it on

 Try it on, try it on, try it on, try it on

G                                   Bm
 On this side, you wanna see that,    there s no change
                F#m    Em
 And nowhere to stay
G                                           Bm
 But if your right, I ll put my keys back,   there s no change
                F#m    Em                    G
 And nowhere to stay,    there s nowhere to stay
                Bm                           F#m    Em
 And nowhere to stay,    there s nowhere to stay
```
