Little Magic Glasses
Johnny Cash

This is off Johnny s Childrens Album. I often say that Johnny could sing the alphabet and I d gladly listen to it. On that album he does. :)

Capo I

```
A                       E            A
I wish I had a pair of little magic glasses
             A              E               A      A7
That I could see the future just by looking through
     D                                   A
Then I could know what road tomorrow s gonna take me down
    A                                                     E
And I could see if I ll be walking down that road with you
        A              E             A
I would keep my little magic glasses hidden
        A          E               A     A7
I would let nobody else see what I see
         D                                A
And everyone would want to know how I can know what lies ahead
            A                          E              A       A7
And they ll wonder when I say tomorrow I see you with me
         D            G               D
But if I see into the future that I m on the road alone
              D             G                E
And where the way was sunny now there s only rain
A                  D       A
I ll put them in a box and seal it with a lock
         A                          E           A
And I ll never take my little magic glasses out again
       A             D       A
I will put them in a box and seal it with a lock
         A                          E           A
And I ll never take my little magic glasses out again
       A             D       A
MMM mmm mmm....
         A                          E           A
And I ll never take my little magic glasses out again
         A                          E           A
Mmm mmm mmm....
```
