So Long Sunshine
Joshua Radin

[capo on 6th fret]

INTRO: **F# Bbm B F# C#**

```
            F#
I was just thinking
             Bbm
It s been a long time
                B
Since I got to see you
             F#              C#
Tell you, I wish you were mine
                  F#
And so I ve been sinking
           Bbm
Into this dark place
                 B
Cause I need to hold you
                F#        C#
Tell you, I ll never be fine
            B           F#
Unless you come home
                 B        C#
I wish you would come home

Ebm     B      F#                  C#
   So long sunshine I ve opened my eyes
Ebm             B       F#          C#
   Clouds of grey have taken my warm sky
Ebm    B    F#    C#
     Away        Still I know
       G#m              B         F#  C#
You re always, you re always

F#
Once
             Bbm
I thought I saw you
            B
Wearing those blue jeans
                   F#            C#
The ones with the holes in the knees
           F#
But I was mistaken
          Bbm
```

```
It was a stranger
                      B
And she flashed me a smile
                 F#        C#
As if she could somehow see
                    B            F#
That I need you to come home
                  B          C#
I wish you would come home

Ebm     B      F#                  C#
   So long sunshine I ve opened my eyes
Ebm             B       F#           C#
   Clouds of grey have taken my warm sky
Ebm    B    F#    C#
     Away        Still I know
       G#m              B         F#  C#
You re always, you re always

B                              F#
 The day broke, it turned us around
                             Ebm
We ended up on the ground
          B          C#
Suddenly everything changed

Ebm     B      F#                  C#
   So long sunshine I ve opened my eyes
Ebm             B       F#           C#
   Clouds of grey have taken my warm sky
Ebm    B    F#    C#
     Away        Still I know
       G#m              B         F#  C#
You re always, you re always
```
