60 Years On
Elton John

```
B               A                        G               F#
Who ll walk me down to church when I m sixty years of age
         Em                                F#
When the ragged dog they gave me has been ten years in the grave
B               A          G                F#
And señorita play guitar, play it just for you
Em                          F#                      B
My rosary has broken and my beads have all slipped through
```

B A E D B

```
B               A                        G               F#
You ve hung up your great coat and you ve laid down your gun
Em                               F#
You know the war you fought in wasn t too much fun
B               A                        G               F#
And the future you re giving me holds nothing for a gun
Em                               F#
I ve no wish to be living sixty years on
```

B A E D B G F# E B E F#

B A E D B

```
B               A                        G               F#
Yes I ll sit with you and talk let your eyes relive again
Em                               F#
I know my vintage prayers would be very much the same
B               A                        G         F#
And Magdelena plays the organ, plays it just for you
Em                                         F#
Your choral lamp that burns so low when you are passing through
B               A                       G             F#
And the future you re giving me holds nothing for a gun
B               A                       B
I ve no wish to be living sixty years on
```
