Tuning: Standard

Another lovely song from Rise To Your Knees.

 Eb                           C#
Maybe you think that you re nylon
             Eb
You seem to say
                          Bb
You are children of the world
     Eb
And maybe you think
           C#
You re an astronaut from stars
      Eb                           Bb
And swipe your honesty and your pearls
 C#                            Bb
Jokes are a greeting in your carbon rings
 C#                      Bb
From your side you say everything

Eb                        Bb
And I think it s common lie
             G#                  Bb
It s on the rise, it s on the rise
Eb                        Bb
And I think it s common lie
             G#                  Bb
It s on the rise, it s on the rise

 Eb                        C#
Maybe you think it s pornography
             Eb
You seem to say
                        Bb
I m the people of the world
     Eb                        C#
And maybe you think you re a genius
```

```
            Eb
Retard of bloom
                  Bb
Your banner is unfilled
C#                       Bb
Now you re selling the touch of your hand
C#                           Bb
How much salvation can my stomach stand?

Eb                        Bb
And I think it s common lie
             G#                 Bb
It s on the rise, it s on the rise
Eb                        Bb
And I think it s common lie
             G#                 Bb       C# Bb (x4)
It s on the rise, it s on the rise

Eb                        C#
Maybe you think this is nowhere
             Eb
You seem to say
                         Bb
You are children of the world
     Eb
And maybe you think
           C#
You re an astronaut from stars
      Eb                          Bb
And swipe your honesty and your pearls
 C#                            Bb
Jokes are a greeting in your carbon rings
 C#                      Bb
From your side you say everything

Eb                        Bb
And I think it s common lie
             G#                 Bb
It s on the rise, it s on the rise        (x2)
Eb                        Bb
And I think it s common lie
             G#                 Bb
It s on the rise, it s on the rise
```

Final solo: **Eb Bb G# Bb** (x2)
