Charles Esten - Sideshow - The Music of Nashville: Original Soundtrack

I found tabbing this song slightly hard, so I hope it s accurate enough. Enjoy!

---CAPO 1---

Intro: **C F** x2

Verse 1:
```
(F)     C                           F
She s a big top tent with bright spotlights
     C                       F
That woman sure knows how to shine
    C                        F
You almost can t believe your eyes
        F              G       C
You can hardly wait to see the sign
       C                        F
She ll have you walking that high wire
C                            F
Jumping through her rings of fire
     C                     F
Give you your moment in the sun
   F              G       C
Be careful not to fall in love
```

Chorus:
```
(C)                F
Cause that curtain falls
              C
The lights go out
             F
The show goes on
          G
She leaves town
Am                 G
If you know what s good for you
C                   F
You ll just let her go
          F               G          C   F
Or you ll end up next to me in her sideshow
```

Break: **C F**

Verse 2:
```
     C                       F
I remember how that spotlight felt
```

```
         C                   F
When she wanted me and no one else
C                  F
Nowadays I play my part
F                          G      C
Pay a dime, you ll see my broken heart

Chorus:
(C)              F
That curtain falls
             C
The lights go out
             F
The show goes on
           G
She leaves town
Am                 G
If you know what s good for you
C                  F
You ll just let her go
          F              G           C   F
Or you ll end up next to me in her sideshow

    Am                 G
And if you know what s good for you
C                  F
You ll just let her go
      F              G           C  F
Don t end up next to me in her sideshow

C F til end...
```
