```
Am                  F         Am
The drone in my ear tells the time
                   G
And the hole in my hand
        F
is a cave
                   Bb             C
for the burned and hostile blind bird.

Am                  F        Am
The money is draped from the frames
                   G
And the lantern on fire
             F
fills the room
                     Bb           C
with the stench of a city subway car.

Am
Someone stole my favourite bone
                                G
I was walking alone, now it s gone
         F
Who ever would ve known
         Am
Who ever would ve known.
