                D                  Bm       D
Just give me a second darling to clear my head,
         D                  Bm                  D
Just put down those sisors baby on the single bed,
    D                      Bm
The sand in the hourglass is running low,
  D                                         Bm
I came through thunder the cold wind the rain and the snow,
   D                 A
To find you awake by your window sil
  A                          G            D
A sight for sore eyes and a veiw to kill

  D                        Bm
I broke down in horror at you standing there,
    D                                 Bm
The glow from the moon shone through cracks in your hair,
  D                        A
I shouted with passion  I love you so much ,
    D                      Bm
But feeling my skin it was cold to the touch,
    D                           A
You whispered where are you? I questioned your doubt,
    A                      G                  D
But soon realised you were talking to God now,

                D                      G
But you ve got blood on your hands,
                D           Bm
And I know its mine I just need more time,
   D                       A                        D (Bm)
So get off your low let s dance like we used too,
              D                        G
And there s a light in the distance,
            D         G
Waiting for me I will wait for you,
   D                       A                        D (Bm)
So get off your low let s kiss like we used too

  D                         Bm
I looked in the mirror but something was wrong,
  D                     Bm
I saw you behind but my reflection was gone,
          D                         A
There was smoke in the fireplace as white as the snow,
  D                           Bm
A voice beckoned gently,  Now its time to go ,
  D                     A
A requiem played as you begged for forgiveness,
      A                              G                  D
Don t touch me I screamed I ve got unfinnished buisness

               D                      G
But you ve got blood on your hands,
               D           Bm
And I know its mine I just need more time,
   D                      A                        D (Bm)
So get off your low let s dance like we used too,
              D                        G
And there s a light in the distance,
            D         G
Waiting for me I will wait for you,
   D                      A                        D (Bm)
So get off your low let s kiss like we used too            [x2]
