```

Verso 1:

```
          D
From the hills of Kaycee, Wyoming
       G                D
Where life s wooly and wild
        D
Came a Navy brat in a cowboy hat
           E7        A
And that Copenhagen smile
           D
And from buckin  broncs to honky tonks
     G            G/F#   Em
He always sang a cowboy song
         D                      B7
We were much too young, havin  too much fun
   G      A       D
As we all sang along
```

Refrão:

```
        G        D
We sang Life s a Highway
             G                          D
There s only one way you re gonna get through it
         G                  D         B7
When she starts to twist be more like Chris
          E7                 A
Pull your hat down tight and just LeDoux it!
          D
When that whistle blows and the crowd explodes
         G              G/F#    E
And them pickup men are at your side
              D         A            D
They tell you good ride cowboy, good ride
```

Verso 2: (Change key to E):

```
          E
From gold buckles to gold records
```

```
      A                      E
Once again he was spinnin   round
     E
Took the whole world on
       F7                   B
And he turned us on to that Western Underground
         E
And from Bareback Jack to This Cowboy s Hat
    A                   A/G#     F#m
His songs were stronger than his pain
         E                  C7
He would not slow down from town to town
              A       B        E
Like children running thru the rain
```

Refrão 2x

```
D
I bet he crossed that river Jordan
                                G
With Saint Peter on the other side
         D         A            D      G
Singin  Good Ride Cowboy, Good Ride!
     D        A             D
Say Good Ride Cowboy, Good Ride!
```
