Words Get In The Way
Gloria Estefan

(inrtro) **F#6 F#7+**

```
  F#6                                                F#7+
I realize you re seeing someone new
 Ebm7                                                  Ebm
I don t believe she knows you like I do
               B
Your temperamental moody side,
       Bm                                             B/C        C#
The one you always try to hide from me.
         F#6                                          F#7+
But I know when you have something on your mind
                     Ebm7                                 Ebm
You ve been trying to tell me for the longest time
            B
And before you break my heart in two,
            Bm                                 B/C       C#
There s something I ve been trying to say to you.

(refrão)
             F#
But the  words get in the way
                 G#
There s so much I want to say
            Ebm
But it s locked deep inside
                 B
And if you look in my eyes,
                              C#
We might fall in love again.
           F#
I won t even start to cry
           G#
And before we say good bye,
              B
I tried to say  I love you
             C#                F#6            F#7+
But the words get in the way.
         F#6                                 F#7+
Your heart has always been an open door
       Ebm7                                 Ebm
But baby, I don t even know you anymore
             B
And despite the fact it s hurting me,
  Bm                                     B/C       C#
I know the time has come to set you free.
```

(refrão)

```
                    B
I m trying to say  I love you
             C#                        F#
But the words get in the way.
```
