Lose Some Time
Grace Potter and the Nocturnals

Lose Some Time
Grace Potter And The Nocturnals
Chords by Is Smith israelgsmith[at]gmail[dot]com

[Intro **D Dsus D** 2x]

```
D                 Dsus               D       Dsus [every line of every verse]
You ve got a baby pretty as a Creole queen
And my old man s got eyes of blue and green
But you took me dancing when our lovers weren t around
You called it losing time in the in between

C   G   D
Ohh ohh ohh

Could be all the booze we drank in Austin
Could be we re just scared of growing old
Could be this ain t no way of living
But there ain t nothing like that rock  n roll

[chorus]
 D            A                            G                     D
And when that light shines on you baby you know it - soothes my soul
D       A                        G                 D
Finding time to lose with you is water - in the dust bowl
      A
I got arms to hold me every night
    G                          D     E
But I m still sleeping - with a ghost
     F             G
Your kisses are so sweet and slow
   F                 E                 D
It feels alright as long as they don t know

We rolled out of a hotel room in Georgia
Just in time to say a quick goodbye
But you don t even look over your shoulder
You re thinking how you ll look your baby in the eye

[chorus]

F     G            D
Swe - et like sugarcane
F    G                 D
Slo-ow like a midnight train
    F            G                D
You like to call me every now and then
```

```
    F                    G              A
And I just can t wait to lose some time again
A  G         F     D
   lose some time again

[chorus] ... as long as nobody knows
Nobody knows [D]
```
