Trees Lounge
Hayden

this is from the live version at convocation hall, so...

The intro part is just G, D,
but you play the D like this 44302x, get that? it s just a full C up two frets...
any way you do the G, D for awhile then it goes

C# (i mute the G anb B strings) then the D again,

```
C#                  D
sit here in tree s lounge
put it in my mouth...

then it goes to a D like this x0023x
D                             A
Cause i need something to forget
                        G
what got me in this mess
                   D
feelin less and less
```

and that s the whole tune i m sure you cvan figure the rest out yourself!

-Janssen
