Something Tell Me
Raul Malo

Something tells me

```
C                   Am             G
Something tells me you donâ€™t even know
C                 Am             G
What Iâ€™m feeling somehow doesnâ€™t show
F                                G
Maybe when youâ€™re lying next to me
F                               G
Maybe you are just to close to see

Remember when we said our first hello
Was that just a dream or two ago
Am I hanging to our memory
Are you missing what was meant to be

   C          Am              F                 G
R: If I could pull you closer I whisper in your ear
   C             Am        F         G         C
   All the little nothings you would ever wanna hear

Time will tell me if Iâ€™m wrong or wright
I just wanna be with you to night
If I could pull you closer I whisper in your ear
All the little nothings you would ever wanna hear

Something tells me you donâ€™t even know
Something tells me you donâ€™t even know
Something tells me you donâ€™t even know
Something tells me you donâ€™t even know
```
