Close The Door Lightly When You Go
Renato Russo

Intro: **D**

```
       A                            D
Turn around, don t whisper out my name
            A             G            D
For like a breeze, it d stir a dying flame
              A                         D
I ll miss someone, if it eases you to know
     G             A                D4 D
So close the door lightly when you go
  G         A                  D4 D
Who was the one that stole my mind ?
  G         A                  D   D4
Who was the one that robbed my time ?
  G                  A              D
Who was the one who made me feel unkind ?
    G             A               D4 D
So fare thee well, sweet love of mine
           A                       D
Take your tears to someone else s eyes
                  A
They re made of glass
         G                D
And are cut like wounded lies
     A                          D
Memories are drifting like the snow
      G             A               D D4 D
But close the door lightly when you go
(Refrão)
            A                            D
Don t look back to where you once hade been
                A
Look straight ahead
             G                   D
When you re walking through the rain
            A
And find a light
                            D
If the path gets dark and cold
      G             A               D
But close the door lightly when you go
      G             A               D  D4 D
But close the door lightly when you go
      G             A               D  D4 D
But close the door lightly when you go
```
