Album: Interpol

Intro: **F# Bbm Fm Ebm**

Riff:
```
e|-------------------------|
B|--10---------------------|
G|----------12-10-9---10---|
D|-------------------------|
A|-------------------------|
E|-------------------------|
```

```
F#                                   Bbm
 I need the sun light, to keep me above
               Fm   Ebm
 These moderations
F#                                            Bbm
 I always hoped for, did all this work for
               Fm       Ebm
 Some piece of mind and just because
F#                                 Bbm
 On this side you wanna see that,   there s no change
                  Fm   Ebm
 And somewhere to stay
F#                                          Bbm
 But if your right, Ill put my keys back   (There s no change)
                Fm    Ebm
 And no hand to play
```

Chorus:
```
 F#                 Bbm
 Please explore my loves endurance
     Fm    Ebm
 And stay, stay
 F#                Bbm
 Please endure my loves exploitations
    Fm              Ebm
 No way, no fucking way no
F#                                 Bbm
 On this side, you wanna see that   there s no change
                  Fm    Ebm
 And somewhere to stay
F#                                 Bbm
 On this side, your gonna see that   there s no change
```

```
                Fm    Ebm
 And nowhere to stay

        F#
 Try it on, try it on, try it on, try it on
        Fm
 Try it on, try it on, try it on, try it on

 Try it on, try it on, try it on, try it on

 Try it on, try it on, try it on, try it on

F#                                      Bbm
 On this side, you wanna see that,    there s no change
                Fm    Ebm
 And nowhere to stay
F#                                            Bbm
 But if your right, I ll put my keys back,   there s no change
                Fm    Ebm                     F#
 And nowhere to stay,    there s nowhere to stay
                Bbm                           Fm    Ebm
 And nowhere to stay,    there s nowhere to stay
```
