Hes Still My Man
Tammy Wynette

He s Still My Man

```
G#         D#                  G#
My man can make my heart feel sad
                   D#                  G#  D# G# G F#
He runs around and that makes me feel bad
              F           Bbm                  C#m
And when he s had his fun he comes in with the rising sun
Fm                                   Bb
Looks at me, says, Honey, don t be mad.

But I ll take the bitter with sweet
And cherish the love I get each time we meet
 Cause when he holds me tight I tell him, everything s all right.
Bb             D#                G#
While my heart crumbles at his feet.

G#                       C                C#
But Lord, please help me stop his urge to roam
        Bb                        Bbm         D#
Help me love him all I can  cause love makes a home
        G#               C        C#
There s something deep inside him I can t understand
    Bb        D#            C    Bb        D#            G#
But meanwhile he s still my man, meanwhile he s still my man.

There s something deep inside him...
```
