Lonely Days
Tammy Wynette

Lonely Days

```
D
Lonely days and nights more lonely
A                   A7
Since my love went away
D              Am      G
Longing for my one and only
A7                                 D
Through the night and through the day

G           D               A7                    D
Daytime memories returning, make each hour eternity
G                  D               A7
But with nigh time silent yeaning, time stands still or will there always be

Lonely days and nights more lonely
Till my love comes back to me
Till my love comes back to me
```
