The Harold Song
Kesha

Intro: **Em G C**

```
Em                        G
I miss your soft lips, I miss your white sheets
C
I miss the scratch of your unshaved face on my cheek
Em                       G
And this is so hard  cause I didn t see
C
That you were the love of my life and it kills me

Em                      G
I see your face in strangers on the street
C
I still say your name when I m talking in my sleep
Em                       G
And in the limelight  I play it off fine
C                                                Em G
But I can t handle it when I turn off my nightlight
C                                                Em G C
But I can t handle it when I turn off my nightlight

                        Em
They say that true love hurts
         G
Well this could almost kill me

     C
Young love murder

That is what this must be
Em                  G                      C
I would give it all to not be sleeping alone
                  Em
The life is fading from me
G
While you watch my heart bleed
C
Young love murder

That is what this must be
Em                  G                       C
I would give it all to not be sleeping alone
```

```
Em                        G
Remember the time we jumped the fence when
C
The Stones were playing and we were too broke to get in
Em                              G
You held my hand and they made me cry while
C
I swore to God it was the best night of my life

Em                            G
Or when you took me across the world we
C
Promised that this would last forever but now I see
Em                      G
It was my past life, a beautiful time
C                                                        Em G
Drunk off of nothing but each other  till the sunrise
C
Drunk off of nothing but each other  till the sunrise

                        Em
They say that true love hurts
         G
Well this could almost kill me

     C
Young love murder

That is what this must be
Em                  G                        C
I would give it all to not be sleeping alone
                   Em
The life is fading from me
G
While you watch my heart bleed
C
Young love murder

That is what this must be
Em                  G                       C
I would give it all to not be sleeping alone

Em                    G   C
It was my past life, a beautiful time
Em                                          G         C
Drunk off of nothing but each other  till the sunrise
 Till the sunrise,  till the sunrise

                        Em
They say that true love hurts
```

```
         G
Well this could almost kill me

     C
Young love murder

That is what this must be
Em                  G                       C
I would give it all to not be sleeping alone
                  Em
The life is fading from me
G
While you watch my heart bleed
C
Young love murder

That is what this must be
Em                  G                      C
I would give it all to not be sleeping alone
```
