Tabbed by: Wayne S

Tuning: Standard EADGBE

Capo: 0

Chords:

D: x00232 or 557775

A: 002220 or 577655

Bm: 224432 or 799777

G: 320033 or 355433

Pretty simple song to play. The intro can be played as a backing track during the verses, and for the pre-chorus, you could pick the given chords in a very similar way.

For the pre-chorus, I like to play it using bar chords (Bm: 799777, A: 577655, G: 355433)

since you'd basically be sliding up the fretboard in a very similar shape. Easy to switch with the bar chords.
