I Did It Again
Luke Bryan

Capo 2

```
D                             Asus
It took me and four of my buddies
          Em                      G
Half the night to pull out my truck
    D                             Asus
I stood there and proclaimed to everybody
         Em                             G
It s the last time I ll mess with this mud
                  Em
The boys they all grinned
                    D
And two nights from then
```

Chorus

```
NC        D                             Asus
I did it again just one more time
    Em                                   G
Even I swore that I d lost my mind
                    D                       Asus
But I turned right around and just like a fool
         Em                     G
Did what any old country boy d do
NC        D
I did it again
```

I took my first sip of cold beer
And tried not to spit it back up
I set it back down on that tailgate
Told myself I d had enough
Then like a real man
I took hold of that can, and

Chorus

```
        D                       Asus
I guess I m a slow learner, I ought to know better
         Em                G           D
Than to do what I do, but I ain t no quitter
```

The other night we got a little rowdy

I woke up with one eye swole shut
Yeah things got out of hand at that party
I said that s it, it s bout time I grow up
But that next weekend, I called all my friends and

Chorus
