Verse

```
C                F
I understand your point of view
Bb                G                           C
Letting me go but I thought you had more faith
C              F
Everything I ve done for you
Bb                            G                    C
You made the mistakes and now you throw this in my face
C                F
And I have worked so hard for you
Bb                       Eb      G
All of this time and you cast me aside
C                F            G#
I understand your point of view
```

Chorus

```
Eb                        F
But I can t seem to get my head around
F                        G#
All the things that I feel good about
C                  Bb
Always seem to disappear
Eb                                  F
And everytime I think I ve got this all worked out
F                       G#
Something chews me up and spits me out
G#                         C
But there s nothing left to fear
F                  G#
I m better alone my dear.
```

Verse

```
C                  F             Bb
You couldn t pick a better time to give me the news

Why don t you kick me when I m down?

I d always believed in you
