When I Call Your Name
Vince Gill

```
E                            A        E
I rushed home from work like I always do
E                          F#           B
I spent my whole day just thinking of you
E                                 A                     E
When I walked through the front door my whole life was changed
A             E            B              E
Cause nobody answered when I called your name
E                             A    E
A note on the table that told me goodbye
E                              F#       B
It said you d grown weary of living a lie
E                         A           E
Your love has ended but mine still remains
A          E            B            E
But nobody answers when I call your name

           CHORUS X 2
E                       A         E
Oh the lonely sound of my voice calling
E               B
Is driving me insane
E                       A         E
And just like rain the tears keep falling
E                   B            E
Nobody answers when I call your name

E                       A          E
Oh the lonely sound of my voice calling
E               B
Is driving me insane
E                       A          E
And just like rain the tears keep falling
E                   B            E
Nobody answers when I call your name
E                       B            E
Oh nobody answers when I call your name
```
