Afraid Of Everest - Lonely Starship
Misc Unsigned Bands

this is how i play the song. it s not 100% correct but it works well with a lower male voice.

```
 Dm            F                    C
You always insist on going to the edge
              Gm
But it just keeps on getting farther
 Dm                    F                            C
You re flyin past the black holes and supernovas, faraway explosions
         Gm
You re landing on the surface
 Dm                           F
Look, you ve found something new
                      C                             Gm
Oh you re getting closer to me now, closer to me now
```

same for the rest of the song, apart from the end where C is replaced by an Am

Dm : x57761
F : x33211
C: x3201x
Gm : x55333
