Golden
My Morning Jacket

Golden

```
D                           C
Watchin  a stretch of road, miles of light explode
G                              C
driftin  off a thing I d never done before
D                         C
Watchin  a crowd roll in, out go the lights it begins
G                            C
a feelin  in my bones I never felt before

E              D          G                   C
People always told, that bars are dark and lonely
                  D                      G
and talk is often cheap and filled with air
E                    D            G                 C
Sure sometimes they thrill, but nothin  could ever chill
                             D               G
like the way they make the time just disappear

D                           C
Feelin  you are here again, hot on my skin again
G                              C
feelin good a thing, I d never known before
D                           C
what does it mean to feel, millions of dreams come real
G                                C
a feelin  in my soul, I d never felt before   mmm

E               D        G                  C
And you always told, no matter how long it holds
                                D                        G
if it falls apartor makes us millonaires
E                     D                 G                  C
You ll be right here forever, we ll go thru this thing together
                         D                      G
and on heaven s golden shore we ll lay our heads
```
