Crime In The City
Neil Young

This is my first tab that I did by ear so yeah...

The whole song is pretty distorted so put your gain & distortion all the way up.
the tabs I found had the opening played with messed up chords that all sounded terrible, I
tabbed it so listeners can identify it.

~ = let it ring a little
b = bend
h = hammer on
p = pull off

Intro

Listen to the song to get the pattern, it really just sounds like messy picking, but
well with the distortion.

Similar to Intro

Picking part again...

1:26 ... Strum The A Chord... (Strum open strings twice in the middle...listen to the song to hear it.)

```

(I m not going to tab the solo because I suck at solos and it will take longer than 5 minutes :P)

Keep Repeating all of this Stuff as it is in the song...

Then...around 3:50

```

```

Yup that s all Im going to do...
So listen to the song, learn it, and play it...this song requires a lot of modifications
the amp for the right sound...
