On The Ave
Pinhead Gunpowder

C(let ring)

```
C                            F               G      C
We chased each other wet + soggy like a crashing wave
C                        F              G           C
Grey + filthy in the gutter breaking all over the place
C                      F       G
Down the Ave. in the pouring rain
           F            G
Saying, even more! even more!

C                       F          G
At the reservoir you impaled your wrist
C                  F          G
On razor wire climbing the fence
C               F     G
I cut my thumb trying to
F             G
Climb into the blind-deaf school

C                  F          G        C
We were a mess, bloody and half-undressed
C                       F             G         C
In the shelter of the shadows of the Frisbie Street creek
     F          G
A canopy of trees and leaves
F               G
With us hidden underneath

DDD G

C           F    G
Time rolls over me
C           F    G
Time rushes over me
C            F    G
Why try to run so fast
F              G
It still passes you by

C                         F       G
I had some friends, a psychotic couple
C                         F       G
They had a room in a residential hotel
C           F       G
They fought in the bed
F               G
```

While we fucked on the floor

```
C                    F      G
We d only slept an hour together when
C                     F     G
The manager set the place ablaze
C                 F        G
I awoke to the smoke and flames
     F           G
And had to kick down the door

DDD G

C           F    G
Time rolls over me
C           F    G
Time rushes over me
C            F    G
Why try to run so fast
F              G
It still passes you by

C                      F         G
Why talk about what could have been
C                      F         G
Why walk around lost reliving moments
C          F       G
Why walk around at all
           F         G
When it s easier to drive a car

C                             F               G      C
We chased each other wet + soggy like a crashing wave
C                        F              G           C
Grey + filthy in the gutter breaking all over the place
C                      F       G
Down the Ave. in the pouring rain
           F(ring)  G(ring)
Saying, even more! even more!
```
