Breathe
Roger Waters

```
   C              F
Breathe in the air
D                                                    G
Make for the meadow and savour the grass while it lasts
C      F
By and by
D                                          G
Shadowy fingers of industry reach for the sky
C                                        F
Brick upon brick, stone upon stone they grow
D                                        G
Choking the atmosphere oh so incredibly slowly
C                                             F
Sulfur and carbon and hydrogen sulphide and lime
C                                            F
Fever corrosion and cover your cities with grime
C                                          F  G
Something is killing the land before your eyes
        C
And the sunshine
          F
is not to blame
             C                        F
Could be the insane inhumane games we play
G      C
Day by day

C          F
Riddle and fool
D                                G
Mushrooming home in a crowd, I m alone
C                   F
Close your eyes lie still
D                                     G
You are a mountain stream and I am a hill
C        F
Far, far away
D                                                    G
There is a field of blossom and bees and new mown hay
C              F
Breathe in the air  (x4)
```
