Long And Lonesome Road
Shocking Blue

```
Am                 G                  Am
On a Sunday night while driving my car
                     E
In the sky a fallin  star
Am               G
Tellin  myself I don t go too far
   F                          Am
And trust by the sound of the rain

F                             Am
Well I wonder, well I wonder where I am
                                   F
 Cos there s a long and lonesome road
                   E              Am
That will find our world of you & me babe
                              F
There s a long and lonesome road
                   E                      Am
That will find our world like it used to be babe

Am             G
Somebody there to show me the way
Am                  E
Yes, I m willin  to pay
         Am               G
And this dear old man can tell me any day
      F                     Am
Don t Know what happens to me
```
