Snowblind Friend
Steppenwolf

```
A               D                   A                       B
You say...this morning...last saw...good friend
A                   B
Lying on...his brain
A                    D                 A      B
Stoned on...new potion...he found...the wall
   A         E          D
Of some...some ungodly hall
    D         A          B            E
He only...a dollar...to live...next Monday
    A                B
He spent...for his mind
        D         A
Did you say..he s blind?
```

The second verse is the same

The end of that verse flying low and dyin slow is just the repeated (**D**) to (**A**)

After the solo, the song changes key up to (**B**) for the last verse so the progression is:

B E B C#
B C#
B E B C#
B F# E
E B C# F#
B C#
E B

then the last words are, again just repeated (**E**) (**B**)
