You Take It Slowly
Telekinesis

Tabbed by Matthew Lundin

C Em G D
you talk a lot but nothing seems to make sense
there s not much there just fragments in the spider s web
defective language let the sound move through your head
collect the dead and maybe you can make a new friend

(riff)

now we re ashamed look what s become of us
the bells are ringing but there is nothing in our eardrums
affect(?) the past for everyone to gawk and stare
just try to slow it down just try to make it more clear

you take it slowly you take it easier
you take it slowly you take it easier
you take it slowly you take it easier
you take it slowly you take it easier
(distortion)
you take it slowly you take it easier
you take it slowly you take it easier
you take it slowly you take it easier
you take it slowly you take it easier
you take it slowly you take it easier
you take it slowly you take it easier
