Firefear
The Head and the Heart

```
F#                              Bbm
Its a long way to the other room while Im
C#                             G#m
Grading papers and tying shoes
F#                              Bbm
Oh, you never had much to loose
 C#                              G#m
So Im blaming you for these hopeless blues

F#                                  Bbm
Whats to say when the kids are gone
C#                                    G#m
Ive made the beds and been left alone
 F#                            Bbm
You look as cold as a stone
C#                                          G#m
Theres no way to right whats been done wrong

G#m         C#         F#  C#  Ebm
And you left me fool
G#m        C#   F#  C#  Ebm
So what to do
G#m       C#   F#  C#  Ebm
What to do

F#                              Bbm
So hold me down if Im running off
C#                                  G#m
They say it gets better baby soon enough
F#                                  Bbm
So I shut my mouth and steel my heart
C#                                          G#m
But I still feel like a girl thinking when we started

G#m                       C#
And I wanna feel the fire again
F#                 C#           Ebm
With you or anybody else
G#m                       C#
And I wanna feel the fear again
F#                 C#           Ebm
With you or anybody else
G#m        C#   F#  C#  Ebm
So what to do
G#m       C#   F#  C#  Ebm
What to do
G#m        C#   F#  C#  Ebm
```

What to do
