Child Of The Moon
The Rolling Stones

```
     C        F          C
The wind blows rain into my face
             F                   C
The sun glows at the end of the highway
  G                            F
Child of the moon, rub your rainy eyes
      G
Oh, child of the moon
           F          Em             G7    C
Give me a wide-awake crescent-shaped smile...
            F                      C
She shivers, by the light she is hidden
            F                  C
She flickers like a lamp lady vision
  G                          F
Child of the moon, rub your rainy eyes
  G
Child of the moon
           F          Em             G7    C
Give me a wide-awake crescent-shaped smile...
             F                   C
The first car on the foggy road riding
             F                C
The last star for my lady is pining
      G                         F
Oh, child of the moon, bid the sun arise
      G
Oh, child of the moon
           F         Em           F      Em
Give me a misty day, pearly gray, silver, silky faced
F          Em             G7    C
Wide-awake crescent-shaped smile...
```
