Let It Bleed
The Rolling Stones

(intro) **D Dsus4 D Dsus4 D G Gsus4 G A**

```
D                           G
We all need someone we can lean on
           A                        D
And if you want to, you can lean on me
                            G
We all need someone we can lean on
           A                        D
And if you want to, you can lean on me

            F#                            G
She said my breasts, they will always be open
A                                      D
You can rest your weary head right on me
               F#                       G
And there will always be a space in my parking lot
A
When you need a little coke and sympathy

D                           G
We all need someone we can cream on
           A                         D
And if you want to, you can cream on me
                            G
We all need someone we can dream on
           A                         D
And if you want to, you can dream on me

      F#                            G
I was dreaming of a steel guitar engagement
A                                                   D
Thats when she took my health and sent it Jasmine Tea
             F#                             G
And then she knifed me in my dirty filthy basement
A
With that jaded, faded, junky nurse  (Oh what pleasant company)

D                           G
We all need someone we can bleed on
           A                         D
And if you want to, you can bleed on me
                            G
We all need someone we can bleed on
           A                         D
And if you want to, you can bleed on me
```

D G A
Take my arms, take my legs, oh baby don t you take my head
D G A D
Bleed alright, bleed alright, bleed alright, you can bleed all over me
D G A D
Bleed alright, bleed alright, you can be my rider, you can cum all over me
