Saturdays Child
The Walker Brothers

Saturday s Child

```
D
Don t stop, don t turn around
                                   G
It s just lonely clown who keeps calling
                                 D
But you ve grown quite out of love with him

D
The city s endless nights
                                          G
The in-crowd gay young faces have been washed away
                         D
By too many through the night and day

Chorus:
           A7                D
Saturday s child who used to say
               A7               D
That she could dance the world away
           C                                     D
Saturday s child just hangs her head and cries today
```

How could you be so blind?
Just waking up to find
What a fool you were, cause you let him break your heart

You turn, you break, you bend
You re left without a friend
When you seemed to have so many at the start

Chorus (repeat and fade)
