I Can't Take You Anywhere
Toby Keith

```
              G                    Em
You ve been a part of my life for so very long
     C                                     D7
It s hard for me to believe sometimes that you re really gone
            G                 Em
I tuck your memory away in my special hiding place
       C                       D7
Hoping no one can tell by the look on my face
            C                           D7
That you re still in my heart and always on my mind
    C               D7
And part of my everyday
     G                      Em
Like just last night I went out for a bite
  C                      D7
I tried to have fun with all of my might
             G                  Em
But even the laughter it wasn t much of a break
       C                       D7
 Cause right in the middle of my salad and steak
      C                    D7
Bobby Joe walked in with a couple of friends
          C                                                D7
And said,  Hey have you heard from her at all man like, Where s she been?

(Chorus:)
      G
And it, struck a nerve
      Em
And it, hit a vein
       C
You d think from all the tears I cried
         D7
And this broken-hearted pain
                   G
I wouldn t have to carry you around with me
       Em                      C
But it seems like everywhere I go
    D7                           C
Somebody wants to know where you been
        D7                   C
Are you comin  back again, I swear
D7               G                Em    C    D7
I can t take you anywhere

So I left all alone, just headed back home
As I listened to the messages on my telephone
```

There was one from my sister
And one from an old friend
He said, I drove by your house tonight dude but you wasn t in
Just checkin up on you boy, I hope you re doin alright,
Oh by the way man, I seen her last night

(Chorus)

```
   C     D7
I swear, I can t take you
C                   D7..
Just can t take you
                 G
I can t take you anywhere
```
