Always The Song
Tony Joe White

Tony Joe White - Always The Song

(Intro: **Am**)

```
Am                            G                        Am
I remember the first time we touched we almost caught fire
Am                            G                      Am
Right there in the middle of night we almost caught fire
C                  F            G                    C
Burning each other down and the feeling went on and on
    Am                          G           Am
And somewhere in the background always the song

It s always there between us so strong it never breaks
Pulling us together sometimes when there s no other way
I wonder if it s more than fire that s kept us together so long
All the way down through our lives always the song

Am          G          F                            C
Baby you re good for me and that s all I ve got to say
Am                G                 F                             E
And all the times we ve been through you ve been a woman all the way

(Guitar solo: chords same as in the verse)

You know when I ve been wounded and I need a place to hide
You see me walking straight up but you know I m bending inside
You try to help me handle the pain when someone I love has gone
And somewhere way out in the rain always the song
```
