Safe
Travis

```
D            D5                 D*   D4
Take all the goods from all the bads
D            D5                 D*        D4
And tell the people that you ve gone away
D             D5              D*    D4
Now lift your head up to the sky
D               D5           D*                    D4
And now you can tell apart the black from the white

And we waste the time they treasure dear
And my only thought is that they could be right
Well look there goes another year
About as distant as a satillite

           D   D5                D*     D4
And I feel safe,          so safe
           D   D5                D*     D4
And I feel safe,          so safe
           D      D7      G      G
And I feel safe,       so safe
   C
So safe

The worlds a small child in the dark
And my mind s the same place that it s always been
The monsters seem to fade so fast
Upon the waking of another dream

           D   D5                D*     D4
And I feel safe,          so safe
           D   D5                D*     D4
And I feel safe,          so safe
           Em
And I feel safe, I feel so brave
                                            D
I m not afraid of anything they ve got to say

If your okay, because your tucked away
 Em
Don t go astray
                              C
You ve got to be just who you are, who you are

{Bridge: D   D5         D*     D4   }
```

When I was young things didn t last
My only cures went to the price of sweets
Now I m older I can laugh
A dolly mixed up man with rotten teeth

```
           D   D5                 D*     D4
And I feel safe,          so safe
           D   D5                 D*     D4
And I feel safe,          so safe
           D      D7      G      G
And I feel safe,       so safe
C
So safe

           D   D5                 D*     D4
And I feel safe,          so safe
           D   D5                 D*     D4
And I feel safe,          so safe
           D      D7      G      G
And I feel safe,       so safe
C
So safe

D   D5                 D*     D4
D   D5                 D*     D4
D   D5                 D*     D4
D   D5                 D*     D4
```
