```
G                   Am
You try to close your ears
G                   Am
And you try to close your eyes
G                   Am
But the blasphemies keep coming
G                   Am
Tempting you with lies

(Chorus)
C                       G
Give thanks for you protection
C                       G
Your watchdogs of the night
C                       G
Who hold the hungry wolves at bay
C                     D           D
And keep them out of sight, out of sight

G                   Am
You just don`t understand it
G                   Am
But it strikes a distant chord
G                   Am
So you look for away of escaping
G                   Am
And sanity`s restored

(Chorus)
C                       G
Give thanks for your protection
C                       G
the watchdogs of the night
C                       G
Who hold the hungry wolves at bay
C                     D           D
And keep them out of sight, out of sight
```

```
G                   Am
You focus your direction
G                   Am
Cloak tightly pulled around
G                   Am
But somewhere in the distance
G                   Am
You can hear a haunting sound

(Chorus)
C                       G
Give thanks for your protection
C                       G
the watchdogs of the night
C                       G
Who hold the hungry wolves at bay
C                     D           D
And keep them out of sight, out of sight

G                   Am
You`re in danger of corruption
G                   Am
And you`re always running scared
G                   Am
You cannot make decisions
G                   Am
You`re completely unprepared

(Chorus)
C                       G
Give thanks for your protection
C                       G
the watchdogs of the night
C                       G
Who hold the hungry wolves at bay
C                     D           D
And keep them out of sight, out of sight
```
