San Angelo
Aaron Watson

(intro) **Dsus2 A F#m Bm E**

```
      A                             F#m
We d walk up and down the Concho River
      Bm                                      E
We d find a soft place to watch the sun go down
           A                        F#m
So was it me or was it what I could not give you
            Bm                       E
She left me shattered, my life scattered all around
```

```
       D         F#m        E              A
She said time would heal my broken heart
        D          A             E
and I d find a true companion for my soul
                  D           E
You know she was right, we were wrong
        A         A/G#        F#m
Nothing more than a pretty song
        Dsus2            E
About a boy who loved a girl
           A
In San Angelo
```

(intro)

```
When I d close my eyes, I could hear her singing
In the chapel where she said we d wed someday
It rattled me so to hear them old church bells ringing
Knowing well enough we d never love that way
```

(refrão)
```
        F#m            A            D            E
Looking back it was a blessing she broke my heart in two
        D            E            D                 E
But if I had never lost her, baby I d have never found you
```

```
         Dsus2                E            Dsus2
About a boy who once loved a girl in San Angelo.
```
